

MFA High Grade Portfolio

Portfolio Construction

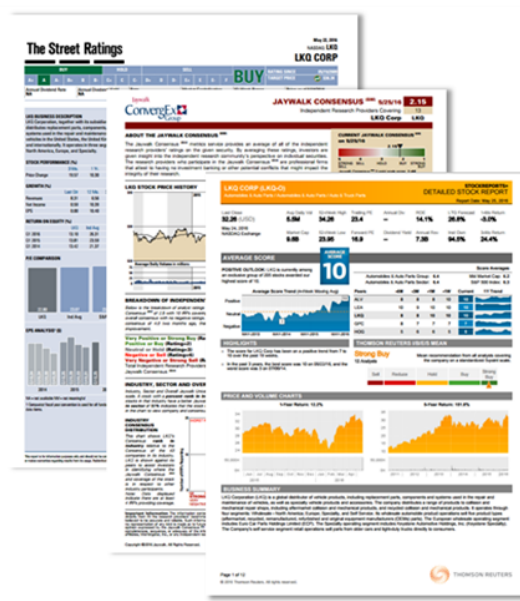

Our MFA High Grade Portfolio strives to deliver enhanced returns by developing a concentrated portfolio consisting of individual stocks of companies who have the potential for superior growth and have strong balance sheets.

We leverage several independent research reports to find companies who have achieved high grades from multiple analysts. The population of the highest grade equity positions are then filtered down to the companies that have demonstrated significant growth on their income and cash flow statements. The strength of their balance sheets are analyzed to find companies who have sufficiently passed solvency tests. The portfolio invests in

companies who we believe can not only make it through the current business cycle, but survive the next one as well.

Our holistic process is applied annually and replaces existing positions that no longer meet our criteria. Included securities are routinely monitored for dramatic rating agency changes and business specific events for potential removal or replacement.

The MFA High Grade Portfolio is appropriate for only a portion of an investor's total portfolio. It's built for investors who are aware of the risks associated with an undiversified or concentrated portfolio, and are willing and capable of taking the risks to seek the potential of attractive returns.

About Millington Financial Advisors, LLC

The firm's portfolio management is led by the father and son team of Charles G. & Charles F. Millington. They have several decades of financial industry experience, are Certified Public Accountants, CERTIFIED FINANCIAL PLANNERS™, and maintain multiple security industry licenses. Additionally, they have both obtained a Master's degree in Business Administration with a concentration in Finance. Their experience and education gives them the perspective necessary to maintain focus and a steady hand in the face of challenging markets.

MFA prides itself on delivering an exceptional client experience. We take the time to listen to our client's unique financial goals and tailor our efforts to help our clients achieve their financial objectives.

Equity Selection Process

At Millington Financial Advisors, LLC we believe outsized returns can be obtained through careful security selection and concentrated allocations to companies and sectors. The MFA High Grade portfolio's stock selection process is focused on finding good quality companies who are trading well below their expected price targets, and have demonstrated superior income statement growth.

Portfolio Characteristics as of December 2019

The MFA High Grade portfolio has no set capitalization or geographic targets. The portfolio's selection process has historically resulted in higher weightings to small and mid cap U.S. companies, but the intention of the portfolio is to include the best companies in the market as identified through our filtration process. As of December 2019 the portfolio held 17 stock positions with 88% being U.S. headquartered companies. Market capitalizations range from \$108 million to \$125 billion.

Sample Companies Included as of December 2019

Company	Weight	Sector	Industry	Business Description
