- Portfolio Characteristics

Portfolio management at Millington Financial Advisors is guided by a cohesive team of experienced professionals holding advanced credentials in investment management, financial planning, and accounting. Bringing together professionals holding MBAs in finance, licensed securities professionals, CERTIFIED FINANCIAL PLANNER™ certificants, and Certified Public Accountants, our collective expertise provides the disciplined insight needed to navigate complex markets with confidence.

From our licensed advisors to our dedicated support staff, every individual in our office is committed to your success, making our entire team a trusted partner you can rely on. Together, we pride ourselves on delivering an exceptional client experience by taking the time to listen to your unique financial goals and tailoring our collective efforts to help you achieve them.

PORTFOLIO CONSTRUCTION

- The MFA High Grade Portfolio seeks to enhance returns through a concentrated selection of individual stocks from companies with strong growth potential and solid financial foundations. Our investment process begins by leveraging multiple independent research sources to identify companies that consistently receive high ratings across several providers. From this group, we further evaluate businesses that have demonstrated meaningful revenue, earnings, and cash flow growth. We then analyze the strength of their balance sheets, and only companies that meet our rigorous solvency standards are considered for inclusion.
- We seek to invest in companies that we believe are positioned not only to navigate current market conditions, but also to remain resilient through future economic cycles. This process is applied routinely, and holdings are continuously monitored for significant rating changes and business-specific events that may warrant their removal or replacement. The MFA High Grade Portfolio is intended to complement a broader investment strategy and may be appropriate for investors who understand the risks associated with a concentrated portfolio and are willing to accept higher levels of risk in pursuit of potentially greater long-term returns.

EQUITY SELECTION PROCESS

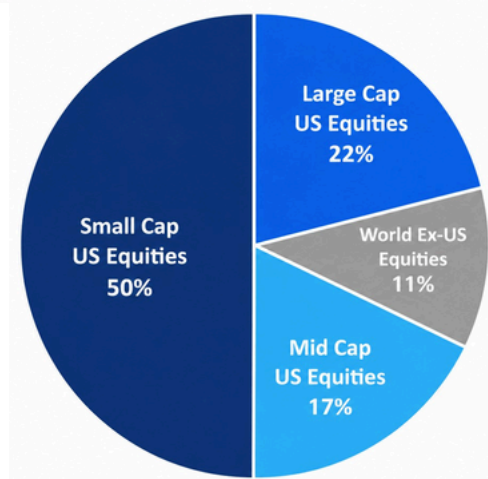

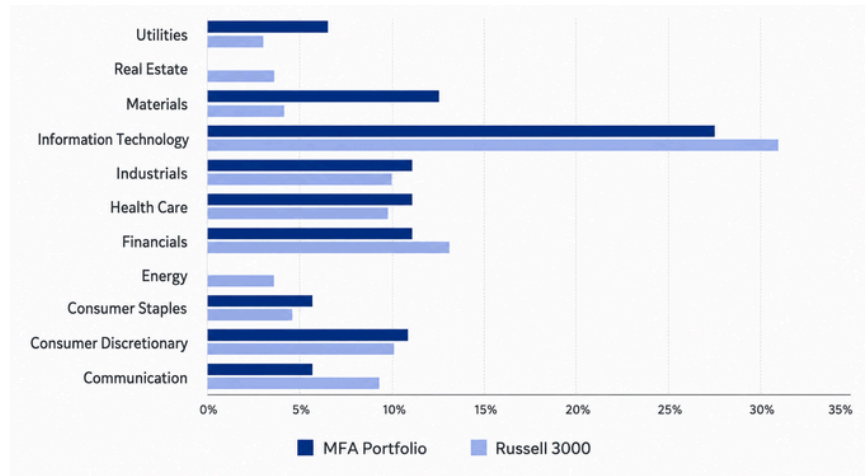

At Millington Financial Advisors, we believe outsized returns can be obtained through careful security selection and concentrated allocations to companies and sectors. The MFA High Grade portfolio's stock selection process is focused on finding good quality companies who are trading well below their expected price targets, with superior income statement growth.

PORTFOLIO CHARACTERISTICS

AS OF JUNE 2026

The MFA High Grade portfolio has no set capitalization or geographic targets. The portfolio's selection process has historically resulted in primarily small and mid cap U.S. companies, but the intention of the portfolio is to include the best companies in the market as identified through our filtration process. As of June 2026 the portfolio held 18 stock positions with 88% being U.S. headquartered companies. Market capitalizations range from \$175 million to \$225 billion within these 18 stocks.

DISCLOSURES

Information presented does not involve the rendering of personalized investment, financial, legal, or tax advice. This presentation is not an offer to buy or sell, or a solicitation of any offer to buy or sell the securities mentioned herein. Certain statements contained herein may constitute projections, forecasts, and other forward-looking statements, which do not reflect actual results and are based primarily upon a hypothetical set of assumptions applied to certain historical financial information. Certain information has been provided by third-party sources, and although believed reliable, it has not been independently verified, and its accuracy or completeness cannot be guaranteed. Any opinions, projections, forecasts, and forward-looking statements herein are valid as of the date of this document and are subject to change. There are inherent risks with equity investing. These risks include, but are not limited to stock market, manager, or investment style. Stock markets tend to move in cycles, with periods of falling prices. Investments in below-investment-grade debt, securities and unrated securities of similar quality, commonly known as “junk bonds” or “high-yield securities”, may be subject to increased interest, credit and liquidity risks. Investments in commodities can be very volatile and direct investment in these markets can be very risky, especially for inexperienced investors. As with any investment strategy, there is no guarantee that investment objectives will be met and investments may lose money. Diversification may not protect against market loss or risk.
